ELECTRO-HEATING ELEMENTS

Heaters for drying and washing machines

Heaters for boilers

www.heating-elements.com.mk

Heaters for Gautchi furnaces

Heaters for Aichelin furnaces

Heaters for thermal processing and metal smelting

Heaters for Ipsen furnaces

Heaters for muffle furnaces

Immersion heaters for galvanization

1. **Protective coating: porcelain** – resistant to all acids, except hydrofluoric acid and bases
2. **Protective coating: borosilicate glass** – resistant to all acids, except hydrofluoric acid and phosphorous acid
3. **Protective coating: acid-resistant inox** of the Wnr. 4571 quality

Protective coating with teflon lining

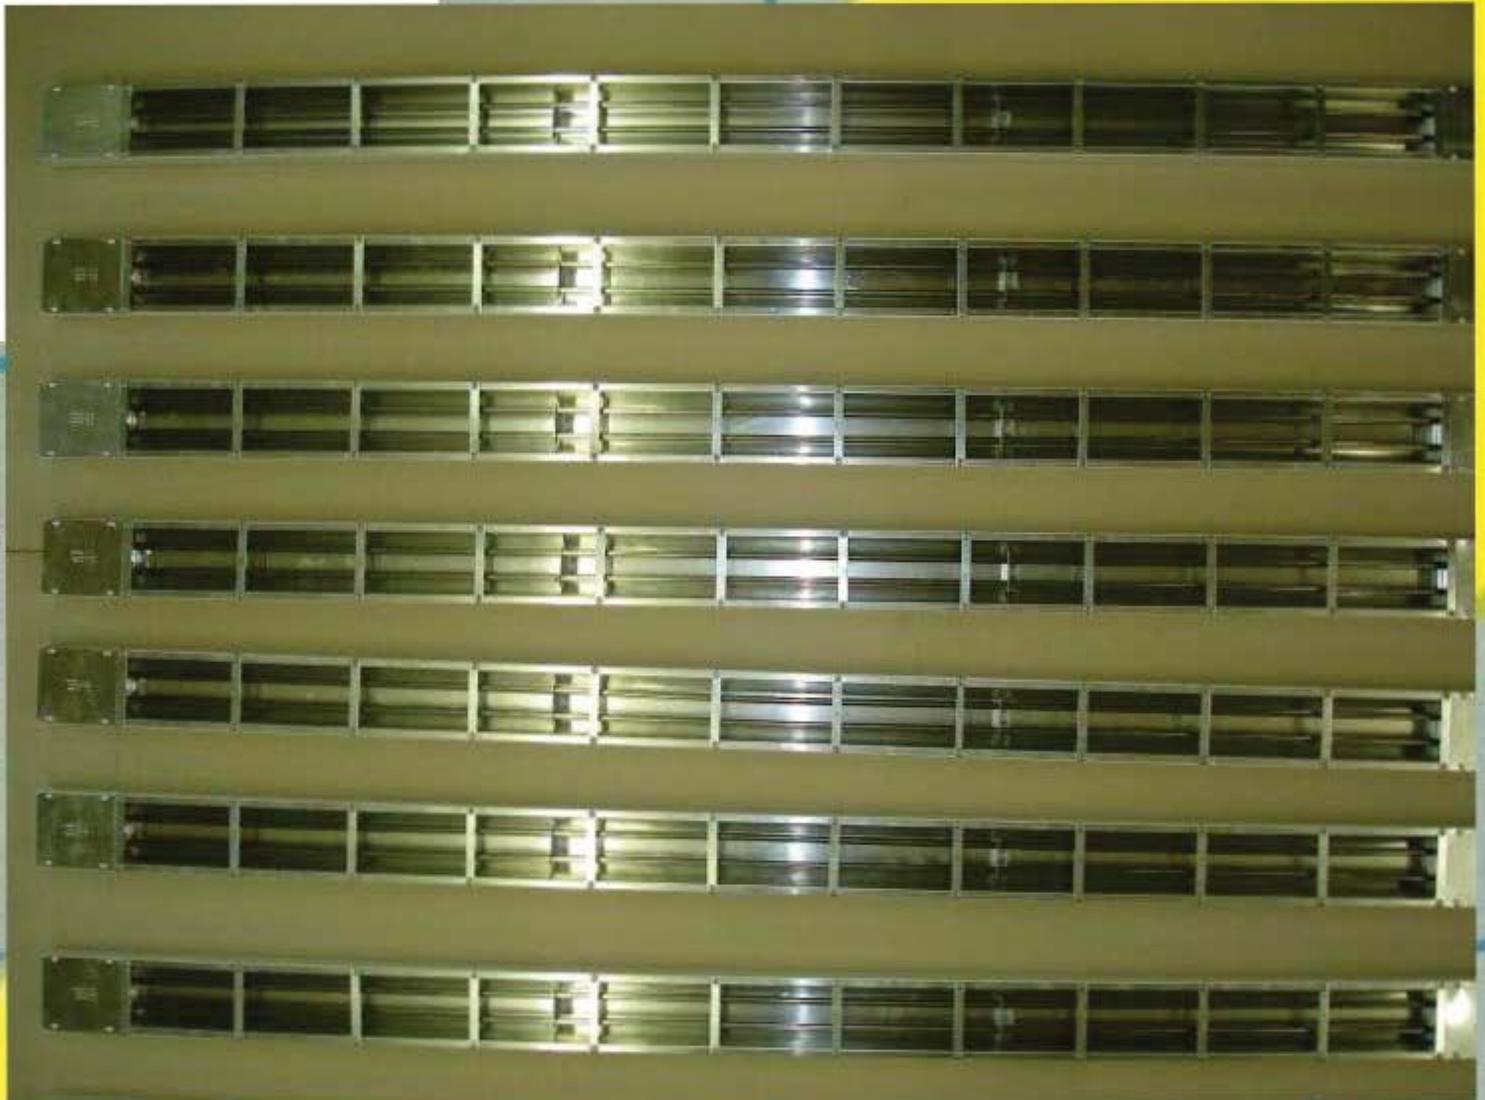

Resistant to all organic and inorganic acids, also hydrofluoric and nitric acid. It is equally resistant to alkalis, chrome, alkaline, cyanide or copper baths.

Reduced resistance to metallised sodium and oxygen or chlorine difluoride.

Electric convector heater with regulation and control cabinet

Electric infrared emitter with parabolic reflector

Special heating elements for honey melting and juice brewing with thermostatic regulation

Band and rod heating elements
